

FACT SHEET CENTER STREET / EL DORADO STREET OVERHEAD REHABILITATION PROJECT NO.08-20, BPMP 5008 (103)
--

Project Description:

Center Street Bridge & El Dorado Street Bridge were built in 1952. Both bridges cross over Mormon Slough, Hazelton and Scott Avenue. Caltrans Bridge inspection reports indicated extensive cracking in bridge decks and complete failure of all bridge joint seals. This project will repair these deficiencies by applying a Concrete Polyester Overlay over entire bridge deck area protecting deck reinforcement and repair all failed bridge joints. This work will extend the life of both bridges for years to come. Project also includes netting bridge joints to prevent Bats from temporarily nesting on the bridges.

Project Schedule:

Preliminary Engineering/ Environmental	COMPLETED
Final Design	COMPLETED
ROW Acquisition	None
Construction	Spring 2016

Project Cost:

Design Cost	\$ 140,000
Construction/CM/Admin	\$ 2,630,000
TOTAL COST	\$ 2,771,000

Project Funding:

Bridge Preventative Maintenance Program	\$2,416,869
Local Match	\$ 354,131
	\$2,771,000
